Two new Time-Mizer Self-Propelleds boost your productivity with 8 and 18% more horsepower

John Deere brings you two new self-propelleds with the increased horsepower you need to boost your productivity. The new 275-hp 5820 and 210-hp 5720 Time-Mizers. That's an 8 and 18 percent increase in horsepower compared to the models they replace. You'll harvest more tons per hour, more acres per day for the efficiency and capacity you want.

These self-propelleds feature 40 segmented knives and a big 24-inch-diameter Dura-Drum™ cutterhead. These knives cut the crop hundreds of times every second for a clean, uniform cut.

The Quick-Adjust-stationary knife lets you get the correct setting in just minutes. Just one wrench, a few turns, and you'll be on your way to a more efficient cut.

For peak productivity, both models can be equipped with a new 4-row converging row-crop head.

So stop on by and let us show you how the time-efficient Time-Mizer design can increase your productivity and capacity.
