Deep tilling, fast finishing disk harrows.

For hub-deep primary tillage, the Allis-Chalmers 2600 Series disk harrows have all the weight you need—from 118 to 175 pounds per blade. Over contours and rolling hills, spring-cushioned lift linkage holds a uniform depth. With the weight and blade options to do the job, the 2600 is available in 11 sizes from 16 to 32 foot working widths. For easy transportation, center-fold and double-fold models are available.

For secondary tillage, and seedbed preparation, the new 2500 Series disk

harrows have penetrating weights of 95 to 115 pounds per blade and working widths of 15 to 33½ feet. Available in center-fold or extra-wide double-fold versions.

A rugged clean design, the Models 2100 (mounted units) and 2300 (pull-type) disk harrows give a smooth finished seedbed in any type soil. Working widths of 9 to 21 feet.

Allis-Chalmers disk harrows are better by design to prepare the way for profits in your productivity.
