

## N.Y. announces feeder calf sales

DRYDEN, N.Y. — The New York Beef Cattlemen's Association has added a special sale to its series of fall feeder calf sales across the state. A sale for preconditioned calves will be held Nov. 13 here at the Empire Livestock Market.

The New York Beef Cattlemen's Association has endorsed the special preconditioned calf sale as part of its emphasis on marketing and has adopted a series of guidelines for preconditioning feeder calves.

These guidelines include

weaning calves not less than 30 days prior to the sale date. The weaned calves are to be eating roughage from a feed bunk and drinking water from a source other than a natural source (ponds, streams, etc.) Calves are to be castrated and dehorned at least 30 days before the sale and are to be

treated for grubs. Calves are to be vaccinated against stress diseases and respiratory infections.

Each calf consigned to the Dryden sale is to be accompanied with a certificate from a veterinarian stating these guidelines have been met.

The New York Beef Cattlemen's

Association will also sponsor its regular fall feeder calf sales and each sponsoring division will make its own provisions to handle preconditioned calves consigned to its sale.

The Southwestern Division Sale will be Nov. 7 at the Angelica Feeder Sales Barn at Angelica; The Southern Tier Division Sale Nov. 14 at the Empire Market facility at Bath; the Eastern Division Sale Nov. 14 at the Chatham Auction at Chatham; and the Western Division Sale Nov. 21 at the Empire Market facility at Caledonia.

## New Trojan T1100.

Field tested for high yield potential.

Today, our researchers are working harder than ever to perfect more dependable, bigger-yielding corn hybrids.

Like new Trojan T1100.

Just try and find a 110-day hybrid that has more potential to become the yield leader for the decade ahead.

This exciting Trojan yield producer has proven its productivity in "on-the-farm" test plots across the corn belt.

Excellent root and stalk system, too, plus the drought tolerance and test weight you're after.

### T1058

- 105-day maturity
- High yielder in its maturity class
- Excellent ear retention
- Fast dry down
- Exceptional root strength
- Excellent drought tolerance
- Plant high populations
- Excellent resistance to Goss' Wilt in areas where it's a problem

### T1230

- 123-day maturity
- Excellent seedling vigor
- High yielder in its maturity class
- Very good root system and strong stalks
- Tall for excellent silage

Pfizer research.

It's paying off.
