

Chester countian exhibits KILE grand champion Angus heifer

HARRISBURG — The grand champion Angus female of this year's Keystone International Livestock Exposition was an April junior yearling called Kruegers Scaara of Syre. This fancy female was exhibited by Chester County's Greg Krueger and family of Genetics Unlimited, Inc., West Grove.

The grand champion Sayre Patriot daughter came out on top of a class lineup of 17 entries and went on to take the junior champion's title before being tagged grand champ by judge Pete Sweeney, East Lansing, Michigan.

Genetics Unlimited, Inc. along with Jayhawk and William Greggs and Sons also exhibited the reserve champion intermediate bull, Sayre Patriot 10M.

An Angus entry from neighboring Lancaster County also captured a champion's ribbon during the Monday show. Fritz Frey of Quarryville led his junior heifer calf to the top of her class and on to take reserve junior champion honors. Twin Oaks Frisky Ann is a Thomas Chaps daughter out of a Twin Oaks dam.

And two Angus entries from the neighboring county to the north, Dauphin County, won in the bull

competition. Monique Sweigard of Halifax exhibited her April junior yearling bull to the top of his class before taking the reserve junior champion title. MVAF Power Play 0099 is the son of the Penn State national champion bull, PS Power Play. And the senior champion bull title went to HF Innovator, exhibited by Hunting Farm and Mountain View Angus Farms, Halifax.

The remaining Angus championships went to out of state exhibitors.

Deborah M. Rishel of McCordsville, Indiana exhibited the reserve grand champion female, Evelyn Marie 001 of RAF, the reserve junior champion female.

Ascent Angus of Oakland, Illinois, exhibited the champion junior heifer calf, Ascent Camilla Anne 11, and also the reserve junior bull calf champion, Ascent Northern Charger. Ascent Angus was named the premier exhibitor and premier breeder of the show.

The senior champion heifer calf was shown by Premier Angus, Inc. and Joel W. Stivers of Pittston, New Jersey. Their entry was Premier Blackbird 2927U. A Connecticut entry, Fairfield Euthalla 014, shown by Fairfield

Do you try to control weeds in your corn field by spraying only two rows out of twelve?
Do you try to control flies by treating cows only at freshening time?
Do you still try to control cattle on your farm by treating cows only at freshening time?

THE LOGIC BEHIND WHOLE HERD DEWORMING

In an unwormed dairy herd, all animals deposit worm eggs on the farm and all animals are subject to further recontamination from infective larvae as herd parasitism continues unchecked.

In a herd dewormed only at freshening, an average of 10 out of 12 animals have not been dewormed. Because egg deposition has not been significantly reduced, and because of infective larvae already present on the farm, all animals are subject to heavy further recontamination.

After whole herd deworming with Baymix, egg deposition is dramatically reduced, and as a result herd recontamination is also significantly reduced with herd productive efficiency maintained. In fact, a recent study shows a benefit of 4.8 lbs./milk/cow/day average when cows are dewormed as late as 200 days into lactation despite the fact they were dewormed at freshening.
