## MAKE EVERY BITE COUNT . . .

**With A KNIGHT  
MINI-AUGGIE  
STATIONARY  
MIXER**

Electronic Scales,  
82 Bushel Capacity,  
3 H.P. Electric Motor  
With Drive is  
Standard Equipment.

Here are some very important features you should consider before you buy any mixer:

1. Mixing area is made of 3/16" copper bearing steel to resist rusting from high acid feeds.
2. This unit is designed to move through a 36" doorway.
3. This unit features direct drive which eliminates all belts, with an industrial oil bath gear box.
4. Standard equipment includes magnet in unloading chute to remove foreign metal.
5. 3 mixing augers guarantee precise mixed rations which will pay for this unit very quickly. Users can verify this factor.

## Texas no longer accepts stallions from CEM-affected countries

WASHINGTON, D.C. — Citing tight budgets, Texas has asked the U.S. Department of Agriculture to remove it from the list of states approved to receive stallions imported from countries affected with contagious equine metritis, USDA officials said.

John K. Atwell, deputy administrator of USDA's Animal and Plant Health Inspection Service, said Texas requested the action because of costs. Under the cooperative agreement between USDA and Texas, the state had provided additional inspection, precautionary treatment and testing to prevent introducing the disease into the United States.

This action leaves eight states that have agreements with USDA to inspect, treat and test stallions from countries affected with the disease, as required under federal regulations. They are California, Colorado, Kentucky, Maryland,

North Carolina, Ohio, South Carolina, and Virginia.

Atwell said contagious equine metritis has been spread by the international movement of infected breeding horses. Since the disease was discovered in 1977, it has been found in Australia, Austria, Belgium, Denmark, Federal Republic of Germany, France, Ireland, Italy, the United Kingdom and the United States. The only case diagnosed in this country have been in Kentucky and Missouri.

Contagious equine metritis is a highly transmissible venereal disease of horses that infects mares, causing them to fail to conceive. The stallion is a carrier, but can be treated by cleaning and disinfection of the genitals, using specific antibiotics.

Notice of this action was scheduled to be published in the Oct. 10 Federal Register.

## Red meat down 20 percent

HARRISBURG — Commercial red meat production in Pennsylvania during September totaled 69.4 million pounds, down 20 percent from September 1980, according to the Pennsylvania Crop Reporting Service.

Cattle slaughter at 66,800 head increased six percent from cattle slaughter during last September while calf slaughter increased three percent to 25,700 head. Hog slaughter at 169,200 head decreased 43 percent from Sep-

tember 1980. The number of sheep and lambs slaughtered totaled 14,900 head, up eight percent from September last year.

Nationally, commercial red meat production during September totaled 3.24 billion pounds, up one percent from September 1980. Commercial red meat production includes slaughter in federally inspected and other plants, but excludes animals slaughtered on farms.

## Gardeners!

### Save Time, Energy and Frustration...
