1850
For making large round bales in the 2000 lb plus category the 1850 is your baler. It makes bales that are a full 6 feet in diameter and 61 inches wide. It's truly the heavy weight among round balers.

1450
The 1450 is the perfect partner for custom operators making bales in the 1000-pound range that are 5 feet in diameter and 45" wide. allowing bales to be stacked two-wide on a trailer.

"air-draulics" The Simple System

Air pressure controls the formation of the bale core. The actual size of the bale core is determined by the placement of an easily adjustable hydraulic triggering mechanism. Once this trigger is activated hydraulic pressure takes over to control bale wrap. The hydraulic pressure maintains constant belt

tension on the bale. Lower the pressure for less densely wrapped bales. Increase it to get densely wrapped bales. Either way, you'll get uniformly shaped bales that will stand up to weather, retain valuable nutrients.
