Outstanding Features

- Thick walled for extra strength. No spreader on the market has thicker walls 30 to 70% thicker steel than competitive spreaders.
- Adjustable relief valve maintains uniform pressure. Prevents over pressurization of tank.
- Primary Shut-Off valve, plus a secondary shut-off provide more than adequate protection against liquids entering the pump.
- Big 512 cubic inch displacement pressure-vacuum pump is standard equipment. Conservation rated at 135 C.F.M. of air at 85 to 90 percent vacuum for filling and will maintain 10 to 15 lbs. of pressure for unloading or agitation in the pit.
- Open door models permit access for cleaning and easy maintenance.
- Walking beam suspension. Stand on 2 600 3 150 3 600 and 4 600 gallon models. (Optional on 1 500 & 2 100 gallon models). Front & rear wheels on each beam follow contour of the ground, provides a smooth level ride.
- Flotation tires reduce soil compaction. Let you spread on soft ground early in season.
- Massive frames resist the wrenching twisting, jolting shocks of hard field usage year after year.
