

Spahr

(Continued from Page A29)
 along the Lititz Pike in Nettsville. But they travel just about daily to the farm to help work it.
 The seventh generation Jim, and his wife, July, and their sons, Jeremy, five, and Chris, two, now live in the family homestead.

Hershey

(Continued from Page A28)
 from members of a branch of the family that moved West who want to see this special room.
 The John Hershey family also includes two daughters, Brenda, in college; and Beth Ann, in seventh grade.
 In addition to the house, there are many other evidences of history on the farm

Just aside the long lane is a stone spring house over a water source that has never failed throughout that long history
 Its ever-flowing waters are symbolic of the Hershey family's long agricultural tradition that has gone into the land for 120 years and will continue for many more to come.

EXCLUSIVE EGG MARKET AVAILABLE

All eggs shipped on racks. Must have facilities for trailer loading.

Your COWS need minerals

because a cow needs a total of 17 different minerals in the proper ratios and at the right levels to maintain peak milk production. The absence of just one of these 17 minerals will significantly affect milk production, digestion, performance and breeding efficiency.

Your cows need our minerals

because one of our 13 specially-formulated mixes is likely to complement your feeding program because our mixes are the only ones which contain our exclusive blend of alkaline-buffered mineral ingredients. If none of our Cattle Special mixes fits your specific feeding program, we can customize the mineral mix you need.

How? By offering a forage analysis service plus a complete feeding program recommendation. With ISF Alkaline-Buffered Cattle Specials you can put your herd on a proven and profitable mineral supplement program which can improve production, breeding efficiency, performance and digestion.

For further information on our products and services call on your nearest ISF representative.
