REA co-ops sell tax write-offs to General Electric

WASHINGTON, D.C. — Two western power cooperatives will sell General Electric Co. the rights to \$280 million in tax credits and depreciation write-offs, Secretary of Agriculture John R. Block announced recently.

nounced recently.

Block said the Rural Electrification Administration has approved arrangements for the Basin Electric Power Cooperative of Bismarck, N.D., and Tri-State Generation and Transmission Association, Inc., of Denver, Colo., to sell "certain tax credits and depreciation deducations" to General Electric.

These sales, the first of their kind by REA-financed cooperatives, are allowed under a section of the Economic Recovery Tax Act of 1981.

For the tax credits and depreciation deductions sold to General Electric, Basin will get about \$35 million and Tri-State about \$14 million.

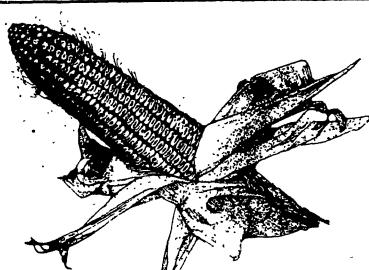

REA Administrator . Harold

Hunter said the tax credits and deductions sold by the two co-ops apply to Basin's 42 percent and Tri-State's 24 percent shares of Unit No. 2 at the Laramie River Generating Station and related transmission facilities.

"The shares represent an investment by Basin of over \$180 million and by Tri-State of over \$100 million," said Hunter. "Unit No. 2, a 500,000 kilowatt coal-fired generating unit at the Laramie River Station near Wheatland, Wyo., went into commercial operation on July 1, 1981."

Hunter said both the cooperatives and the government benefit from the sales.

"Because of the sales," he said, "borrowers will be better able to attract private financing rather than government loan commitments because these revenues will raise their equity levels. In addition, the write-offs will provide General Electric money that can be used to expand and create new jobs."

PLANT FOR BIGGER YIELDS WITH MIGRO CORN.

MIGRO HP-470 Top yields. Fast drydown.

This mid-season single cross represents a yield breakthrough. It offers excellent emergence, strong stalks and a good root system for a healthy jump on yields. And its fast drydown helps you roll in those big yields early . . . without high drying costs or moisture discounts. In its maturity, HP-470 is perhaps the best yielding hybrid available anywhere.

Call today and get your seed on order.
