

For a limited time: bonuses of \$1,400 to \$2,600 on John Deere row-crop tractors ... \$3,200 to \$4,000 on 40 Series 4-WD ... plus waiver of finance

Now through January 30, 1982, buy a new 2- or 4-WD tractor listed here and earn a bonus in John Deere money. After the dealer makes delivery, the bonus money will be mailed to you ... money you can spend for goods or service in this store.

There's more. Use the new variable-rate John Deere finance plan and no finance charges will accrue on these new tractors and on new or used implements bought with them until June 1, 1982*. One distinct advantage of variable-rate financing is that you can finance the tractor and implements you need now and automatically benefit from any future reduction in interest rates.

John Deere's forward-looking "rear end" design is too tough to top ... even after 20 years

Many John Deere owners can't remember a time their field tractor didn't have planetary final drives. That's only natural, because John Deere hasn't built a big tractor without them for the past 20 years.

Planetary final drives spread stress loads over three points instead of concentrating them in one. It's the best way we know to extend service life.

Wet disk brakes have also been a John Deere standby for the past 20 years. You get positive stopping force combined with extremely long life. The brakes operate in a sealed compartment and are

cooled by hydraulic oil. They also never require adjustment.

About four years ago, John Deere began using additional pinions in the differential. Again, to spread torque load. Our latest designs use needle roller bearings.

John Deere design is still too tough to top ... even after 20 years.

Year after year, a John Deere seems newer.
