

THE EXECUTIVE™ 8083 SERIES II

Computer Controlled Dairy Feeding System

FEEDING IN YOUR LOOSE HOUSING SET UP ★

Computer feeding provides you with all the advantages of individual cow rationing in tie stall housing. For many years dairymen have known that tie stall feeding cows and loose housing is the way to house and milk cows. Computer feeding gives the dairyman in loose housing the answers to feed for production as in a Tie Barn.

Ration Fed To This Cow

75

Individual choice of rations are computerized. Computer looks at a tag per cow and will allow her to eat to the end of each 12-hour interval. Computer tape the consumption of feed at intervals available.

KEYBOARD & PRINTER

DAILY PRINTOUT SUMMARY

This is a completely automatic system that allows the dairyman to limit and select the concentrate fed to each cow, and know how much each cow has eaten. There are systems to handle high moisture or dry concentrate.

THE 8085 WILL PROVIDE FOR

The dairyman

1. A feeding system that will provide the correct amount and type of concentrate.
2. A means of changing amounts and types of rations with no cow handling.
3. Less health problems.
4. More milk with less feed.
5. A printed copy twice daily of the feed used by each animal or animals that need attention only.

Water pipes deliver. Even in the dead of winter they are out there and you're not. You bet they are. Heating systems and efficient water ice-free...just set the Watt Watcher™ thermal energy use. Big-throated, non-stick plastic valves opening in. Each of your cows get all the water they need for production. Pipes are tough, too. Quality-built with rugged heavy duty and CD-50™ epoxy finish to stand up to weather. Don't waste money on anything less than a red and yellow Ritchie. Call your Ritchie dealer for water that won't quit.

WATER THAT WON'T QUIT
