Top Quality Feeds

Each Penn Pro feed has a balanced protein-to-energy relationship, formulated to complement your roughage feeding program. And our complete feeds also contain a "Fat Booster Pack" which acts as a buffering agent in the rumen and helps correct fat depression problems. This "Fat Booster Pack" can also be purchased separately in 50 lb. bags to add to your Pennfield Dairy concentrate and grain feeding program.

Accurate Nutritional Programming

The Pennfield Dairy Feeding Program utilizes our Complete Total Ration (CTR) concept, which balances the forages on your farm with the proper grain feeding levels. By carefully balancing roughage and dairy feed to meet the cows nutritional requirements, the Pennfield CTR program insures that high producing cows are fed correctly, and that low producing cows are not overfed.

Increased Dairy Profits

By increasing your profits on your better producing cows, you will be able to cull your poor producers. And, in today's market, more profit per cow is the key to a profitable dairy operation. Pennfield can help you achieve those profits. Write or phone us today.
