GMS... Over 2.5 million cows mated.

ABS' Genetic Mating Service is an important part of thousands of successful dairy breeding programs. First and second choice mating sire recommendations are suggested for your cows based upon their individual strengths and weaknesses.

Kevin Holtzinger (right) of East Berlin, Pa., confers with ABS Representative Ira Boyer.

"I see GMS as a worthwhile long-term investment. I'm already seeing better-looking offspring," says Ken Holtzinger. "I like the individual GMS profiles done on each cow," adds Kevin. With 240 Holsteins evaluated through GMS, first and second choice mating sire recommendations aid in Kevin's decision-making for his entire herd's breeding program.

Kevin also likes the convenience of establishing his semen needs in advance so that semen is on hand when needed.

Let GMS benefit your breeding program as it has for this area dairyman.

Contact your local ABS Representative for full details.

MADE TO LAST WITH FIBERGLASS — from FIBERDOME

Fiberdome Storage Bin

Fiberglass is practically dent proof. Stands up to long periods of hard use. Contents stay fresh because fiberglass absorbs little or no heat. Because there is very little condensation on the inside, moisture cannot alter the contents of material being stored. Fiberglass is rust resistant. Acids and salts can't hurt it.

Fiberdome Forage Funnel

Economical to Use • Simple to Install • Easy to Operate • Eliminates Dirty Chutes • Directs Flow of Feed • Saves Wear on Silo Chutes • Adapts to Any Make Silo

Fiberdome Feed Cart

The only all fiberglass feed cart • Buff exterior white gel coat interior • 14 bushel capacity (4.93 Hectoliter) • Immune to silage acids does not rust • Easy to load, unload and sanitize • Tricycle gear with one swiveling caster • Length 68" • Width 31" • Hopper depth 23" • Tire Diameter 8"

Fiberdome Calfhutch

Insulation value provides warmth in winter while remaining cool in summer. Hutch may be nested for compact storage. Hutches are easily moved by use of firmly imbedded bolts. Studies show respirator problems, disease and calf mortality are reduced when hutches are properly used.
