

# PUZZLED ABOUT UNLOADERS???

**NOW A TOUGH "LIVE-ACTION"  
BOTTOM UNLOADER DESIGNED  
TO OPERATE UNDER A FULL HEAD OF HIGH MOISTURE GRAIN!**

**"NEW"**

## POWER SWEEP AUGER UNLOADER

**UNLOADER CAN BE INSTALLED IN MOST  
EXISTING HARVESTORE STRUCTURES!**

I would like more information on the "NEW" POWER SWEEP AUGER UNLOADER. I understand I am under no obligation.

Systems, Inc.**

P.O. Box 7  
New Holland, PA 17557

5/22

- \* Gears are thru-hardened chrome, moly alloy steel or carburized and hardened nickel.
- \* Shafts are chrome, moly alloy steel thru-hardened for maximum toughness.
- \* Unloader components are not "buried" or formed in concrete, but can be easily installed and removed from HARVESTORE trough.
- \* A single 5 H.P. electric motor powers the entire unloader. The motor is especially designed for the high-starting torque — needed to start the sweep arm under load.
- \* Two-speed gear reduction drive. A rugged gear reduction unit drives the auger and sweep arm drive system. Low fixed speed is used for hard starting. High fixed speed is used for maximum clean-out delivery.
