**Penn-Jersey HARVESTORE
Systems, Inc.**

P.O. Box 7
New Holland, PA 17557

5/29

- * Gears are thru-hardened chrome, moly alloy steel or carburized and hardened nickel.
- * Shafts are chrome, moly alloy steel thru-hardened for maximum toughness.
- * Unloader components are not "buried" or formed in concrete, but can be easily installed and removed from HARVESTORE trough.
- * A single 5 H.P. electric motor powers the entire unloader. The motor is especially designed for the high-starting torque — needed to start the sweep arm under load.
- * Two-speed gear reduction drive. A rugged gear reduction unit drives the auger and sweep arm drive system. Low fixed speed is used for hard starting. High fixed speed is used for maximum clean-out delivery.
