

**PENNFIELD'S
603 PIG POWER...
A PROVEN WINNER**

Pennfield's New Baby Pig Feed Will Maximize Your Gains!

Pigs weaned at three weeks of age need special care and nutrition to minimize the stress of early weaning. That's why Pennfield developed 603 Pig Power, formulated for better digestibility, palatability and nutrition. It is composed of selected, highly refined ingredients that minimize the stress of going from a whole milk diet to a dry feed.

Pig Power produces excellent gains, superior feed conversion, and more uniform pigs, and produces a better skin color and hair color.

We thoroughly tested our new feed in the field. Take a look at the outstanding results.

At Pennfield, we can show you the way to increase your productivity and achieve peak performance. Ask your Pennfield representative or call today for more information on Pennfield's swine feeding program.
