Now is the Time

(Continued from Page A10)

(4) Thefoal develops into a more cooperative and evenly proportioned animal.

The only disadvantage is that they must always be done by the closed method, as many young foals seem to have very large inguinal rings.

You should discuss early castration with your veterinarian for proper surgical procedures, urges Chester D. Hughes, Extension Livestock Agent.

Now providing livestock owners helpful on-the-spot feed counseling

Through personal contact with you and your livestock operation, the MoorMan Representative can recommend research-developed products and feeding programs that fit your individual needs and preferences... plus feeding and management suggestions geared for today's profit-minded livestock producer.

In addition, our representative can supply you with a wide range of labor-saving livestock equipment.

If you aren't feeding MoorMan's, find out what our high-quality, high-performance products and feeding programs can do for your cost of production.
