

SCS chief to speak at annual meeting

ANKENY, Iowa — Peter Myers, chief of the U.S. Department of Agriculture's Soil Conservation Service, has been added to the program for the 37th annual

meeting of the Soil Conservation Society of America, Aug. 8-11, 1982, in New Orleans, Louisiana.

Myers, who was named chief of the USDA agency in April, will

participate in a panel discussion, "The politics of Making Conservation Happen," on Wednesday morning, Aug. 11. Myers will speak about the future of federal

programs in land and water conservation.

Other participants in the panel discussion include Marilyn Reeves, natural resources coordinator for the U.S. League of Women Voters, Washington, D.C.; Don Collins, director of product development for the Monsanto Corporation Authority, Down-Kenneth G. Higgs, director of the Metropolitan Toronto and Region Conservation Authority, Down-

svlew, Ontario; and Dennis Le Master, chairman of the Department of Forestry and Range Management at Washington State University in Pullman.

The general theme of the meeting is "The Politics of Conservation." More than 700 conservationists from the United States and Canada are expected to attend. Headquarters for the event will be the New Orleans Marriott Hotel.

BEACON MINERAL SUPPLEMENTS

who needs them?
You do!

Quality roughage alone can provide much of the protein and energy needed for milk production. But since roughages may lack both balance and quantity of minerals necessary for maximum milk production, bone and muscle development, and the most efficient utilization of other nutrients—many dairymen need a mineral supplement program.

How can you tell if you need a mineral supplement program?

Let us make a free analysis of your forage crops. We'll give you a report on the nutrient value of your hay, silage, or other roughages, along with recommendations for any supplements—if necessary. We won't try to sell you anything you don't need!

Our three mineral mixes—Beacon Phos-Min, Beacon Mineral Ade and Beacon Cal-Min—are formulated by highly respected dairy nutrition specialists. The supplement they recommend will contain the necessary minerals to make up deficiencies or imbalance in your roughages and to achieve the proper calcium-phosphorus ratio in your total feeding program.

You can rest assured that you aren't paying extra for exotic ingredients, high transportation cost, and expensive promotion and sales cost.

With BEACON, you get more mineral units per dollar invested.

Mineral supplements, formulated especially for the cow at reasonable cost, are part of what we call "No nonsense feeding".
