Locally consigned cows 480.00-1250.00; Springing heifers 820.00-1150.00; Open heifers 350.00-600.00.

# BIG FARM POWER AND EQUIPMENT

## COMPARE STEIGER AGAINST THE COMPETITION

### AT AG PROGRESS DAYS, AUGUST 24-26

#### WHAT TO LOOK FOR IN A FOUR WHEEL DRIVE:

#### THE KEYS TO COMPARING 4WD TRACTORS.

←  
**Drawbar horsepower.** The most basic criterion is how much can it pull as measured in horsepower at the drawbar. This is more important than engine horsepower because the drawbar is the working end of the tractor.

\$  
**Cost per drawbar horsepower.** This is the real way to measure what you're getting for the money. Just divide the cost by the tested drawbar horsepower and you've got a figure you can use to compare all makes and types of tractors.

💧  
**Fuel consumption.** How much work can the machine squeeze out of a gallon of diesel fuel? While many people gauge fuel efficiency by gallons per hour, this is not the best measurement. The best way, amount of work per gallon, or more scientifically horsepower hours/gallon.

%  
**Drive train ratio.** Divide the drawbar horsepower by engine horsepower. The result expressed as a percentage indicates how much power is actually available to do work at the drawbar.

⚖️  
**Weight to horsepower.** Generally speaking, the higher the weight to horsepower ratio, the more power the tractor will ultimately deliver. You might ask, why doesn't everyone build them real heavy? The answer is the cost of steel. But like in everything else, you can find quality if you look for it.

🔊  
**Noise.** All manufacturers have a decibel rating on their cabs. One Steiger four wheel drive has been proven to be as quiet as 75.5 decibels under full power and load. That's about as quiet as a pickup truck. A quiet tractor reduces operator fatigue, improves productivity.
