# LISTEN

## TO WHAT EASTERN FARMERS ARE SAYING ABOUT HOFFMAN SILAGE INOCULATOR.

"We find that by using Hoffman Silage Inoculator we have consistent high quality haylage eliminating hot spots and heating and sour smell, should it be too wet. It also improved the corn silage — no mold, etc. It produces a sweet smell and the cows relish it. We also like it because it doesn't eat up the equipment."

**FULMER BROTHERS**  
Nazareth, Pennsylvania

"Normally, seepage starts about one week after silo filling. This year I had no seepage and the moisture was at least the same, if not higher, than in the past several years. Two of my neighbors tried it and think it's the best product they have ever used. They tried other products, but were not satisfied with the results. It really does what the literature says it will do."

**BRUCE BRESEE**  
Ulster, Pennsylvania

"We've used Hoffman Silage Inoculator for two years. We put up high moisture ground shelled corn by spreading the inoculator on the corn in the bin on the combine and letting it get mixed that way. We found we could feed the treated high moisture corn right into the hot weather. We have also checked it on haylage. We are more than well satisfied with it."

**LARRY SWEENEY**  
Mechanicville, New York
