

## Is Your Layer Program Meeting Today's Market Conditions?

At Pennfield, we have the program you need to meet those conditions, and to achieve the best return in a tough market. Because, unlike many feed companies, we design a total program specifically tailored to your birds' needs - a program that can improve your profits by reducing expenses, increasing production, or both.

For example, we can show you how using a higher density feed could mean using less feed with no loss in production. And that means more eggs for less money.

But we know there's a lot more to layer production than choosing the right feed. Factors like good sound financing. The right housing and equipment for your layers. Good healthy pullets. And expert on-farm management. Pennfield's program takes all these things into consideration.

Add to that our highly trained sales and service staff, our technical service department and local laboratory, our dependable delivery service - and you've got everything you need for top performance from your flock.

Pennfield's layer program will help you reduce expenses and maximize returns. In today's economy, that's more important than ever.
