

Midred Seeds, Top-O-Hill Farm, Downingtown, claimed top honors in the Jersey, left, competition with 6-year-old Top-O-Hill Special St. Patty.

Two brothers won the Guernsey titles in open and youth competition. Jeffrey McCullough won the Grand Champion award with his junior yearling heifer followed by brother Douglas winning the reserve champion honors.

Reserve Grand Champion of the open Holstein show went to Chester and Galen Smith of Smithdale Farms, Shippensburg. The Smith's won the honor with 3-year-old Smithdale Linda Betty Chief.

Lee-Ida entry

away with all the top honors. Young won the championship title with Three Springs Feggy, a five year old. Reserve Champion honors went to Three Springs three-year-old entry.

Brothers vied for the championship titles in the Guernsey competition. Jeff McCullough's junior yearling heifer won the purple rosette, while brother Douglas followed close behind with his senior yearling heifer winning the Reserve Champion honors.

In the Jersey show, championship honors went to Mildred Seeds of Top-O-Hill Farm, Downingtown.

Mildred won the championship titles with her six-year-old entry, Top-O-Hill Special St. Fatty. This Jersey champion has a production record of 12,000 pounds of milk and 653 of fat.

Reserve Grand Champion honors also were won by Mildred with two-year-old Top-O-Hill Milestone Tempest. This two-year-old is projected over 10,000 pounds milk.

Winning the Junior Champion Jersey slot was Anna Uhlman showing her senior yearling heifer. And, once again, Mildred Seeds captured another title, the Reserve Junior Champion.

The John Ocker family of Shippensburg swept the Ayrshire show winning all the titles. Grand Champion Ayrshire honors went to Lisa Flashy Lori, owned by William Ocker.

HERE'S THE FILL & STIR PIPE FOR YOUR LIQUID MANURE TANK

Whenever you fill an above-ground liquid manure storage tank you worry if you will ever be able to get it empty again. Will the solids settle in the bottom to cause an impossible mixing problem? Will your equipment clog? Will you need to add so much water you'll be hauling manure for days?

Now you can relax. Because US Farm Systems of Pennsylvania has just designed a unique fill and stir pipe unit. This fill and stir unit sits vertically in over the top of the tank and you use your present transfer pump. You can transfer/fill the manure under the top crust. And since the top crust is not broken you keep all the plant nutrients in the tank.

When you get ready to haul manure, the mixing capability of this unit really goes to work for you. The top opening with a flexible snout moves up and down and sideways to allow you to discharge a stream of liquid in any direction to break up the top crust. At the same time, you can start a stirring action at the bottom of the tank by forcing liquid out of the lower opening of this unit.

So don't worry if you will get the manure out of your above-ground liquid manure tank any more. Write to US Farm Systems of Pennsylvania, 3053 Barren Road, Oxford, PA 19363. Or call today for an action-packed demonstration. Phone (301) 398-2948.

DISK BLADES

With the development of Earth Metal™ disk blades IH engineers have produced a super disk. As a result, there is less breakage and blades last up to 20% longer. In addition, USDA Tillage Lab tests show that harrows with IH crimped center blades need up to 33% less drawbar pull, saving fuel. 20% longer life at up to 25% savings.
