### Cecil Co. DHIA June, 1982

Following are the top ten herds for June 1982 in Cecil County participating in the DHI program. These results are based on a Fat Corrected Milk basis. FCM allows the comparison of milk production records, varying widely in percentage of butterfat and thus differing in energy values.

Pioneer Valley Farm 138	52.1	1.76	51.1
Davis E. Carroll 116	53.8	1.69	50.7
Dix-Lee 49	50.9	1.66	48.9
Elm-Brook 35	41.1	1.87	48.1
Blair & Cammy Yurkanin 14	39.1	1.89	47.5
Lovdal Farms 68	43.3	1.74	47.0
Albeck Farms Inc. 184	48.8	1.59	46.8
Long Green Farms Inc. 124	45.6	1.65	46.7
Stafford, Carl C. 74	48.2	1.59	46.6
R.D. Dempsey & Sons 77	47.6	1.58	46.3

**These super-flexible gang hangers fight off obstacles in the toughest soil.**

Bush Hog® Dura-Springs

Rugged terrain can shorten the life of even the strongest disc harrow. But Dura-Spring gang hangers give Bush Hog® harrows extra protective flexibility that keeps them bouncing back from punishing jolts—year after year.

Unlike conventional gang hangers, Dura-Springs are specially tapered from top to bottom, adding 50% more flexibility when a blade strikes an object. Bearings are encased in rubber mounts for added shock resistance.

The result? Reduced stress, increased service life—without increased weight and fuel consumption.

Dura-Springs are optional equipment on almost every tandem disc in the Bush Hog line—the industry's largest. Come in for a close-up look today.

**Effective Chemical Incorporation. Efficient Seedbed Preparation.**

**BUSH HOG SEEDBED MASTER**

**1440 Flex Wing Disc With Optional Dura-Spring Gang Hangers.**

This economical new disc from Bush Hog® is ideal for chemical incorporation and seedbed preparation. And, as in every Bush Hog, the design features work together to make up a rugged, high performance machine that handles the roughest soils. Optional dura-spring gang hangers are specially tapered for increased and controlled flexibility. Bearings are encased in rubber shock mounts for added protection. Standard rigid gang hangers feature triple-lip sealed, completely regreasable ball bearings.

Gang angles are 20 degrees front and 18 degrees rear with blade spacings of 7½", 9" or a combination of both. Wings flex up and down 9 degrees for better pulverizing on uneven ground.

Come in soon and take a close-up look at Bush Hog quality.
