Md. farm under observation due to rabid skunk

ANNAPOLIS — The Maryland Department of Agriculture's Animal Health Section has placed the livestock on an Allegany County farm in the Cumberland area under observation for a period of 30 days following the owner's discovery last week of a skunk in a pen with several feeder pigs.

The skunk was killed and submitted to the Maryland Department of Health and Mental Hygiene laboratory and found infected with rabies. It is not known if any of the farm animals were bitten by the rabid skunk.

There has been an increasing incidence of rabies in the Allegany County area of Maryland during the past year, according to MDA.

Any questions regarding unusual activities of wild animals should be directed to the Office of the State Veterinarian (301) 454-3831.

"I was very impressed with my first SBM brooder"

Don Kauffman
Columbia, Pennsylvania

"I could see it worked well and would last," says Don.
"I compared SBM to 600 watt electric heaters using pigs the same age: pigs under SBM reached 40 lbs. when my other pigs were still at 35 lbs... with the exact same amount of feed. The SUNNYPIG hogs were cleaner on concrete and looked healthier. Even when they were on the truck, you could tell which hogs had been under SBM." Don goes on, "Since then I've bought 20 more SUNNYPIGS. Boy, do they put out heat!"

LET SBM SUNNYPIGS DO FOR YOU WHAT THEY DID FOR DON.
