Pa. grain, tobacco crop down

HARRISBURG - Pennsylvania's 1982 production of corn for grain, oats, and tobacco is expected to be below last year based on Sept. 1 conditions, according to the Pennsylvania Crop Reporting Service. Corn for grain production is forecase at 126.04 million bushels, six percent below a year ago. Acreage for harvest is set for 1.37 million acres with a yield of 92.0 bushels per acre.

Pennsylvania oats production is

forecast at 19.77 million bushels, one percent below last year. Acreage for harvest is set for 335,000 acres with a record yield of 59 bushels per acre.

The state's tobacco production is forecase at 24.7 million pounds, nine percent below last year. Acreage for harvest is expected to be 13,000 acres with an average yield of 1,900 pounds per acre.

Grape production is estimated at 55,000 tons, 10 percent below the 61,000 tons harvested in 1981.

At the U.S. level, corn production is forecast at a record high 8.32 billion bushels, one percent above 1981 production. Acres for harvest is set for 73.02 million with an average yield of 113.9 bushels per

Oats production is forecast at

599.0 million bushels, 18 percent above last year. Acres for harvest is expected to be 10.38 million with an average of yield of 57.7 bushels per acre.

All tobacco production is forecast at 1.92 billion pounds, seven percent below last year. Indicated acres for harvest are 903,100 with an average yield acre of 2,131 pounds.

Grape production at 5.58 million tons is 25 percent above the 4.46 million tons produced last year.

Simmental Assn. names trait leaders

BOZEMAN, Mt. The American Simmental Association has announced 86 purebred Simmental bulls have been designated as 1983 Genetic Trait Leaders, an increase of eleven from last year's total of 75. Eighteen sires qualified as a trait leader in more than one category.

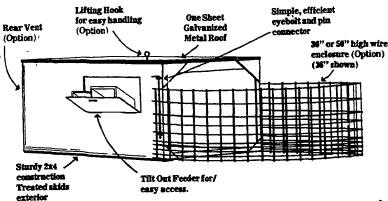

"Recognition of the 86 Simmental trait leaders was a result of the evaluation of 518,069 progeny performance records representing 54,043 management units," said American Simmental Association Executive Vice President Earl B. Peterson. In all, a total of 1,610 bulls were considered.

All Simmental bulls that meet qualifying progeny standards are automatically included in the ASA Sire Summary, and are eligible for consideration as genetic trait leaders. Bulls may be named in more than one trait, provided their progeny rank in the top two percent for each trait. Traits, for which leaders are listed include: calving ease; weaning weight; yearling weight; carcass value; daughters' first calf calving ease; and daughters' first calf weaning weight.

Signal, whose picture will appear on the back cover of the 1983 Summary, is the only bull to qualify as a trait leader in four categories. Bold, C&B Western, Extra. and Siegfried earned the honor in three traits. Thirteen bulls were issued Genetic Trait Leader awards in two traits, and twenty sires made their first appearance on the Genetic Honor Roll.

Data on all 1,610 bulls is contained in the 1983 National Simmental Sire Summary, which will be released later this fall. The Sire Summary is mailed free of charge to all members. Non-members may obtain copies by mailing a check in the amount of \$5 for each copy requested to the American Simmental Association, One Simmental Way, Bozeman, MT 59715.
