

Four ways to better hay

Gehl haying machines are the next best thing to sunshine. They help you make better hay even when the weather is going against you.

No-plug mowing. Our new disc mowers and disc mower conditioner tackle heavy standing grass or wet, down and tangled material without plugging. Heavy duty discs rotate at 3000 rpm to cut through just about any crop.

Leaf-saver mower conditioners feature all gear main drive and gentle-action conditioning rolls. Even when conditions are marginal you'll get fast-drying windrows that retain important nutrients.

Gentle raking. Our new full line of finger-wheel rakes gently gathers swaths up to 22-feet wide. They give you light and airy windrows while saving leaves and nutrition.

Exclusive Total Density Control (TDC). Only Gehl's new round balers with the unique "air-draulic" system give you Total Density Control. Lets you adjust bale density to suit the crop, moisture and field conditions. You get bales that stay round and resist weather. Choose from two models, the

1850 for over 2000 lb. bales or the 1450 for over 1000 lb. bales.

And you can easily move these big bales with Gehl bale handlers.

Beat the weather and make better hay. See your Gehl dealer.

USDA proposes changes in P&S rules

WASHINGTON, DC — The U.S. Department of Agriculture is proposing to consolidate some and remove other of the rules dealing with livestock dealers, market agencies and meat packers under the Packers and Stockyards Act. "We are proposing to remove some outdated rules and consolidate others," said B.H. Jones, head of USDA's Packers and Stockyards Administration. "This will result in clearer understanding of the rules and lessen some restrictions on business activities without decreasing the protection provided under the Packers and Stockyards Act for producers and consumers."

USDA is proposing to:

- Revise and consolidate eight trade practice rules into one. The rules deal with market agencies selling consigned livestock and purchasing out of consignments;
- Remove rules on employment restrictions, soliciting con-

signments and giving or accepting gratuities;

- Retain in present form a rule dealing with price guarantees and a policy statement dealing with payment of buyers' expenses;

- Remove three recordkeeping and accounting regulations and retain two others concerning the responsibilities of agents in accounting to their principals;

- Revise and consolidate four rules dealing with accounting procedures into two; and

- Consolidate two rules and one policy statement authorizing disposal of records into a single rule.

The proposals were published in the Sept. 24 Federal Register.

Comments will be accepted until Nov. 23. Written comments, which will be available for public inspection, should be sent to the Packers and Stockyards Administration, USDA, Washington, D.C. 20250; phone 202-447-7051.

Kendall ID-4™ Teat Dip

THE TEAT DIP WITH POVIDONE-IODINE

Contains Povidone—Iodine complex with 0.35% (or 3500 ppm) titratable iodine

Why Povidone—Iodine?

- Non-staining and non-irritating
- Reduces the spread of organisms which may cause mastitis.
- Broad spectrum antimicrobial activity
- Tested* for efficacy by North Louisiana Hill Farm Experimental Station, LSU, Homer, LA.

*Results available upon request

SPECIAL OFFER

Buy one case (any size) ID-4 Teat Dip, send us proof of purchase and we'll send you a FREE 12 oz. jar of Kendall Udder Cream.
