**Total Density Control**

Gehl has Put Good Ideas to Work in their 1850 Total Density Control round balers. With the patented "air-draulic" system, you control the size of the bale's center core and the density of the outer wrap to fit your operation and the crop's moisture content. The 1850 can produce bales 61" wide and up to 72" in diameter. Stop in today for more information on Gehl's 1850 heavyweight champs.

Baler includes hydraulic twine wrapping mechanism with cylinder, hoses and belt lacing repair kit.
