WHEN IT COMES TO UPRIGHT STORAGE, NOBODY BUT MADISON CAN CLAIM SO MANY "FIRSTS."

Madison structures have been going up on American farms for 65 years. Today, in spite of competition from many other companies, one out of every four silos in America is a Madison! Here are some of the reasons.

FIRST Madison was first to offer a concrete stave, bottom-unloading, atmosphere-controlled feed storage and processing system.

FIRST Madison developed the Vibra-Cor® stave for greater load-bearing capability and better insulation.

FIRST Madison pioneered the fiberglass sealed roof for atmosphere-controlled structures.

FIRST Madison developed the double-rafter silo roof.

FIRST Madison was first to develop its own silo accessories, each designed to be the best available.

FIRST Madison pioneered the fiberglass chute cover and skylight.

FIRST Madison pioneered the safer high-back platform filler stand.

FIRST Madison offered the first industrial-type caged ladder for better protection.

FIRST Madison pioneered the "hoop tensioning follow-up program" to assure maximum structural integrity by torque-testing each hoop, after installation

FIRST Madison pioneered the use of Gunitz for better inside finish in all atmosphere-controlled structures.

Before you buy upright storage, talk to your Madison dealer. He's first in a lot of ways and he wants to prove it to you.
