

Four ways to better hay

Gehl haying machines are the next best thing to sunshine. They help you make better hay even when the weather is going against you.

No-plug mowing. Our new disc mowers and disc mower conditioner tackle heavy standing grass or wet, down and tangled material without plugging. Heavy duty discs rotate at 3000 rpm to cut through just about any crop.

Leaf-saver mower conditioners feature all gear main drive and gentle-action conditioning rolls. Even when conditions are marginal you'll get fast-drying windrows that retain important nutrients.

Gentle raking. Our new full line of finger-wheel rakes gently gathers swaths up to 22-feet wide. They give you light and airy windrows while saving leaves and nutrition.

Exclusive Total Density Control (TDC). Only Gehl's new round balers with the unique "air-draulic" system give you Total Density Control. Lets you adjust bale density to suit the crop, moisture and field conditions. You get bales that stay round and resist weather. Choose from two models, the

1850 for over 2000 lb. bales or the 1450 for over 1000 lb. bales.

And you can easily move these big bales with Gehl bale handlers.

Beat the weather and make better hay. See your Gehl dealer.
