

**If the engine quits,
two-way radio
could pay for itself
today.**

Lose just one day during the planting season, and it could make all the difference between a good crop and a poor one. That's why you should be equipped with a Johnson FM two-way radio.

With two-way radio, if your engine quits, you can simply call for help. Chances are, a mechanic can get to you and get you going again while there's still some daylight left.

But without two-way radio, you'd just have to start walking. There are a lot of other ways Johnson FM radio can save you time and money. Why not let us show you how you can lease or own a complete two-way system for as little as 75¢ a day.

Sale conducted by John J. Rutt.

Farm Show welcomes youths

HARRISBURG — Every year, thousands of excited youngsters travel from all over Pennsylvania to the Farm Show. Many bring with them their prize animals, crops or exhibit in hopes of going home a grand prize winner.

Ever since the first Farm Show in 1917 which had 40 boys competing in a corn and potato judging contest, the Farm Show has been a growing educational experience for young people. By 1922, boys were striving for medals and silver loving cups in dairy cattle, swine, corn and potato judging contests. The Awards were given by State Department of Instruction officials.

A new era in Farm Show youth competition came in 1926 when Francis Murren of Hanover took home \$266.60 for his Baby Beef Grand Champion. The 1,066-pound steer was sold at auction for 25 cents per pound, marking the beginning of Farm Show Junior Livestock Sales.

Today, many Pennsylvania meat firms have given outstanding support to the Junior Livestock Market Sales.

The 4-H competitions have grown quite a bit since their beginnings in 1924, too. Today, 4-H competition is in full swing with entries in competitions for lambs, beef, dairy cattle, entomology exhibits, tobacco, eggs, dressed turkeys, capons, honey, corn, sheep blocking and grooming,

homeconomics, safe tractor driving and potato judging.

Future Farmers of America and Future Homemakers of America were initiated to the Farm Show in 1926, with exhibits that were displayed during the show. FFA members now compete in activities such as dairy cattle, swine, small grains, potatoes, tobacco, vegetables, apiary products, eggs and poultry competitions.

In the beginning years, these competitions were limited to the boys only, but with changing attitudes about women came more and more women competitors in traditional "male" categories.

The dream of every Farm Show youth competitor is to take home "the prize." These youngsters work all year with unseen dedication just to reach the Farm Show. Their work is rewarded in the end whether they win or not, through the thrill of competing with other young people. All those who compete leave the Farm Show with something special to remember the event.

Last year the Farm Show Commission dedicated one night to benefit our farm youth. This year, once again, Farm Show holds a Farm Youth Benefit Night Concert starring Jerry Reed and Bill Anderson, with all proceeds going to improvement of facilities at the complex for our farm youth.

See you at the Farm Show.

The All New DION 3060 Forage Blower

OUTSTANDING FEATURES:

- **THE LARGE-SIZED FEEDING HOPPER**, equipped with a rear and high protector, reduces material spillage. The action of the 12" (30 cm) diameter auger and the 8-blade intermediate fan provide incredible regular and even feeding flow. Its construction permits a most easy approach and a non-return start/stop arm insures the operator's safety.
- **THE GIANT 59" (150 cm) DIAMETER FAN** has 6 extra-strong blades which easily blow all types of forage at incredible heights. The fan blade tips have been especially designed to preserve their original shape and efficiency for years of dependable service.
- **THE INTERMEDIATE FAN** sucks the forage coming from the hopper, avoids bottlenecks, speeds up and drives material, in the same direction, towards the main fan. This results in less power requirement, noiseless operation and longer life of your forage blower.
- **THE EXTRA-STRONG POWER TAKE-OFF** can be safely coupled to most tractors. Shear bolts provide an extra margin of safety to both the forage blower and the tractor.
- **THE ADJUSTABLE ROTATING DRUM OUTLET** allows free flow of the forage which can be directed to different angles thus avoiding loss of power.
- **THE 3060 MECHANISM** is simple and of easy maintenance. It is powered by belt drives to provide positive and noiseless operation. All adjustments are precise and quickly done.
- **THE MAIN FRAME** is constructed with tubular steel style to provide both great rigidity and minimum weight. Most of the frame elements are welded so as to guarantee maximum strength at important stress points.
- **THE PROTECTORS** open and close horizontally, by actuating pressure locks therefore you get instant access to the mechanism - without losing time.
- **A UNIQUE LEVER SYSTEM** raises or lowers the wheels for easier transportation or operation.
