Lubritecton Days

IH No. 1 engine oil... the engine oil with the guts to go all out for 200 hours!

Your best value in the long run. With 200-hour oil changes you...
 • SAVE MONEY
 • SAVE TIME
 You win both ways. Here are just a few of the reasons why.

Dispersant additive helps the oil hold contaminants in suspension for a longer period of time to prevent sludge.

Additives are blended in higher amounts than in standard automotive oil to withstand the greater temperatures of heavy-duty operation and resist chemical breakdown.

Anti-wear additive minimizes wear, preventing galling and scoring of the heavily loaded areas of the engine such as the valve lifters and cam lobes.

Detergent additive keeps the engine clean preventing varnish and lacquer deposits that cause premature ring sticking and poor heat transfer.

Use IH No. 1 engine oil for:
 • All four-cycle diesel engines
 • Truck and car gasoline engines requiring an API SE oil

Use IH Low Ash engine oil for...

- All gasoline farm and industrial tractors
- Cub Cadet tractors
- All two cycle diesel LPG and natural gas engines
- All truck and car gasoline engines requiring an API SE oil

IH Low Ash engine oil also exceeds all requirements for use in passenger cars. It's designed to eliminate the principal gasoline engine problems of exhaust valve torch type failures under heavy load and oil ash fouling of spark plugs under light load. IH Low Ash engine oil used with unleaded gas is the ideal combination to maintain performance and extend engine life.

Now 5 of the finest lubricants come in the handiest container.

- Five IH high quality lubricants now come in 5-quart containers. These 5-quart containers have been exclusively designed for IH with these features:
- Longer neck for easy pouring
- Convenient carrying handle
- Resealable cap
- Non-tipover dual base
- Stronger than most gallon containers.
- Good beyond the last drop! Reusable for decanting out oil. Handy storage for paint thinners, many other uses important! Whenever reusing a container, clean it thoroughly, know the product being stored and clearly relabel its contents.

Use IH Inter-Season engine oil
 A 10W-40 oil recommended for all truck and car gasoline engines. Designed for all season use this oil exceeds API service classification SE for truck and car gasoline engines. It has passed IH's grueling tests. Has low ash content. Minimizes metallic deposits. Extends plug and valve life.

Hy-Tran's superb quality begins with the special additives that protect your tractor and equipment from corrosion extending operating life. It keeps sludge out of your hydraulic system and preserves its lubricating qualities even under excessive gear loading. Because these special additives are top grade this protection lasts. But even Hy-Tran should be changed each year or every 1000 hours whichever comes first. It's available in many sizes so you can take advantage of quantity savings.

Multi-purpose grease
 Formulated to operate from -20 to 350°F International 251-H EP grease is perfect for most truck tractor and equipment applications—especially chassis lubrication wheel bearings, spline shafts, and water pump bearings. For maximum savings order in 120-pound drums. Also available in a 35-pound pail and a handy 14½-ounce cartridge that fits most grease guns. See us for prices.

INTERNATIONAL Hy-Tran: the best transmission fluid you can buy!
