

...STILL ONE STEP AHEAD

Let Us Show You The Difference In Disks

There's a big difference in disks. And if you've never taken the time to really study what makes one disk more productive than the next, drop into our dealership and let us point out a few facts using models from White Farm Equipment Company.

More weight means better disking.

Not a revolutionary thought, but there are ways to spot built-in working weight without putting the implement on a scale. One example is massive box beams of high carbon steel used in all of our disks. More steel means more than

durability and rigidity. It adds weight to keep disks in the ground.

Models for every need. Whatever type of disk you need, we've got a model for you. From our massive 281 Offset to the 270 series flex-wing tandem, to the 250 series semi-flexible frame, to the 264 rigid disk. Each offers specific features and attachments to make tillage easier and faster.

Come in and let us show you the difference in disks. And the difference in White Farm Equipment.

One hefty difference in disks is built-in working weight. You can see it in the massive main frame box beams of this 271 disk.
