**GUNITITE Silo Relining & Repairs**

Extensive tests have been conducted on Gunitite. Below are some of the properties of Gunitite:

1. Excellent bonding
2. High Density
3. Extreme strength and hardness
4. High resistance to absorption

The excellent physical properties of the material are due to the water content being only the amount needed to satisfy chemical hydration.

Reseal and re-strengthen your silo with Gunitite.

**THIS IS THE BEST WAY TO PUT UP YOUR FORAGE CROP—HERE'S WHY:**

**1** Better light reflectivity. The light gray Madison Vibra-Cor® staves reflect light 2 1/2 times better than dark blue—and better than any other stave. Result: Less temperature fluctuation in the structure.

**2** Better insulation value. Concrete is a much better insulation material than steel! And the unique Vibra-Cor® design makes a Madison stave better than any other concrete stave. Result: Your Madison provides lowest possible temperature variations.

**3** Less expansion and contraction. The real key to top quality haylage. Less heat transfer. Less "breathing." A better atmosphere for a perfect feed—no matter how much the weather fluctuates.

**4** The best unloader. Laidig, Madison helped develop it and knows it inside and out. So your new Nutri-Matic® was designed to make the most of this remarkable unloader that's been called "the best there is!"

**5** Greater capacity. Because a Madison Nutri-Matic® doesn't require space-robbing breather bags, you get a bonus of extra capacity! Up to four feet of valuable extra room.

**6** Better service. Ask a Madison owner. For 65 years, Madison service people have been building a reputation that can't be beat.

**7** Lower maintenance. No breather bags to replace. A better unloader. The best silo construction in the world. No wonder Madison owners are happy with their lower maintenance costs.
