

“Well, I’ll tell you what I’m doing. I’m cutting back on my corn acres. How ’bout you?”

“Planting less corn, but more XL-61 and T1100.”

“Do you really have that much confidence in them?”

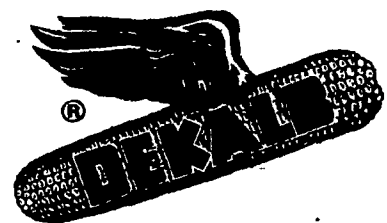

“Sure do. And with their reputation for yield, disease resistance and standability, they’ll be in big demand.”

“Sounds like a good mix. But do you have any performance data?”

“Right here. And take a look at the XL-55a while you’re at it. It’s another high-yielding number with proven disease resistance.”

“Mighty convincing.”

“You’ll be even more convinced when you plant them on your own farm, and prove it to yourself.”
