AG DAY MARCH 21, 1983

Millions of people are involved in the many steps and enterprises required to get food and fiber from our American farms to towns and cities across the nation. It's a chain of linked human cooperation. Each person contributes his or her expertise in the growing, processing, transporting and marketing until the final goal of feeding America is accomplished.

To honor this thought that "The food chain is a human chain," March 21 is set aside as Agriculture Day. One special day to recognize the links in this chain. Links that make this vital industry work so well for all of us every day. We invite you to join with us on March 21 as we say "Thank you" to the men and women who make American agriculture work so well.
