

EYE OPENING DISCOUNTS for SPRINGTIME BUYERS

Every White Farm Equipment Company moldboard plow features our famous box-beam construction for strength and rigidity.

A great job of plowing starts with a great plow.

If you really take pride in plowing, stop into our dealership and see the full line of innovative plows from White Farm Equipment Company.

Strength for better plowing. Every White Farm moldboard plow starts with an extra-big box-beam main frame for more working weight and toughness. In fact, every component is designed with an extra measure of toughness.

A tradition of quality. Every plow bottom we build is polished by hand to insure faster scouring in the field. Every style is designed to work well in a variety of soil conditions. Our 125 year history of building plows demands this kind of care.

Choose from 10 models. There's a White Farm moldboard plow for you, whether pull-type, mounted, semi-mounted or flex-back. Ten models in all. From one bottom to twelve. So come on in and see our full line. You'll be glad you did.

Let us show you the difference in disks

There's a big difference in disks. And if you've never taken the time to really study what makes one disk more productive than the next, drop into our dealership and let us point out a few facts using models from White Farm Equipment Company.

More weight means better disking. Not a revolutionary thought, but there are ways to spot built-in working weight without putting the implement on a scale. One example is massive box beams of high carbon steel used in all of our disks. More steel means more than durability and rigidity. It adds weight to keep disks in the ground.

Models for every need. Whatever type of disk you need, we've got a model for you. From our massive 281 Offset to the 270 series flex-wing tandem, to the 250 series semi-flexible frame, to the 264 rigid disk. Each offers specific features and attachments to make tillage easier and faster.

Come in and let us show you the difference in disks. And the difference in White Farm Equipment.

One hefty difference in disks is built-in working weight. You can see it in the massive main frame box beams of this 271 disk.

Our walking beam gauge wheels and refined air meter can provide the accuracy you demand. In conventional, minimum or no-till seedbeds — in almost any conceivable row crop.

If you can find a better planter, we'd like to see it.

There's a planter sitting on our lot right now that many farmers across the country — and right here in this county — believe to be the most accurate planter on the market today. The 5100 Seed Boss™ planter from White Farm Equipment Company.

Accurate seed depth, even spacing. This planter uses our innovative walking beam dual gauge wheel system to put seeds consistently at the depth you select — even in rough ground or varying soil types. And that's especially important in today's reduced tillage seedbeds. Plus its gentle seed metering provides accurate seed spacing and population, not only in corn but also in other row-crops like soybeans, milo and cotton.

It doesn't cost anything to look. Drop by our dealership in the next few days and take a look at the Seed Boss. We'll point out its advantages. Answer any questions you have. If you're thinking about a new planter, you owe it to yourself to see the Seed Boss.
