### CUSTOM BUILT BARN CLEANER UNITS

Plus All Accessories Including Paddles, Bar, Etc.

On the reverse stroke, the paddles fold back against the bar to by-pass and mix the manure they will carry forward on the next stroke. The push-pull action is illustrated.  
Replacement Chain For Shuttle-Stroke Cleaner.  
**Totally Enclosed Gear Box Shuttle-Stroke Barn Cleaner**

**Gutter Bar Available**  
Unique design of shuttle-stroke cleaner provides extra versatility of arrangement in barns with single or odd-number gutters, especially when used in combination with the chain type cleaner.  
Pitman bar attached to chain of mechanical drive unit transforms rotary motion into back-and-forth motion. Steel bar in corner of gutter moves back and forth in eight-foot strokes.  
On the forward stroke, malleable iron paddles fold open across the gutter to move manure toward the spreader.

### CUSTOM MADE LIQUIMATIC ELEVATOR AVAILABLE

The Liquimatic elevator runs independent of the gutter mechanism, nine times faster, to whisk liquids and solids into the spreader.  
Heavy-gauge channel-sections steel flights are bolted every two feet to the #67 extra heavy agricultural chain. Galvanized elevator trough is 18 1/4" wide, 8" deep, with continuous sanitary bottom to eliminate manure drop-off.  
Chain is driven about 95' per minute by 1 h.p. or 1 1/2 h.p. motor operating on 220 volts. Motor mount is adjustable. Pulley wheel has oilite bearing.  
Drive mechanism of Liquid elevator is completely covered. Drive shaft also features oilite bearings.

Replacement Chain on Liquimatic Elevator

Moves Manure 95' per Minute

ALL PARTS INTERCHANGEABLE ON ORIGINAL UNIT
