

### Potato stocks up 40 percent

HARRISBURG — Total stocks of potatoes stored in Pennsylvania on March 1 were 2,100,000 hundredweight (cwt.), 40 percent more than a year ago, according to the Pennsylvania Crop Reporting Service. March 1 potato stocks represented 36 percent of production compared with 29 percent a year ago.

March 1 potato stocks are estimated at 117 million cwt. for the 15 major fall producing states. This is up five percent from last

March 1 and 20 percent above two years ago. The March 1 stocks accounted for 40 percent of production in these 15 states compared with 39 percent a year ago.

Potatoes processed to March 1 in eight major processing states totaled 71.1 million cwt., four percent less than in the same period a year earlier. Processing during February totaled 11.7 million cwt. compared with 11.8 million cwt. for February 1982.

for national advertising and promotion.

—Reducing supports for those dairy farmers who increase production by a percentage at least equal to the national surplus

percentage (7.6 percent).

—Those farmers reducing production would receive \$10.00 hundredweight for up to 30 percent of their marketing history. These funds would come from reduced

payments to those farmers who increased production.

In meetings with Sec. of Agriculture John Block and other USDA officials, the Grangers will discuss export and trade issues, foreign investment in ag, PIK program and adequate funding for brucellosis eradication and agricultural research.
