**BEFORE YOU BUY A DISC HARROW
COMPARE A KRAUSE**

Krause Rockflex Discs are unequalled in the field.

COMPARE

QUALITY:

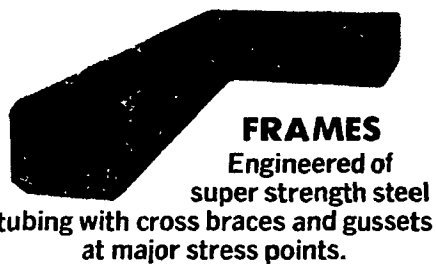

TIE RODS AND SPOOLS

Alloy steel tie rods are 1¼" in diameter on heavy duty units (1½" on medium duty). There's a nut on both ends for easy servicing. Krause spools are ductile iron and weigh 20-30 lbs. each. Precision machined with large diameter bells to fit snug against disc blade. SPOOLS ARE KRAUSE MADE.

COMPARE

DESIGN:

FRAMES

Engineered of super strength steel tubing with cross braces and gussets at major stress points.

WING HINGES

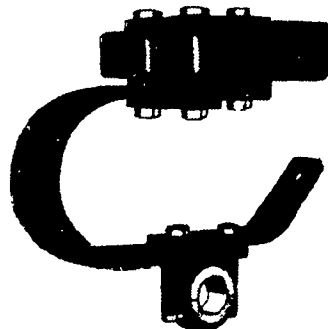

Krause uses big 1¼" diameter bolts on HD units (1½" on medium duty) with over 10" of wear surface area.

COMPARE

PERFORMANCE: "ROCKFLEX" BEARING ARMS

Krause invented the Rockflex" arm in 1965. This C-shaped arm flexes over obstacles. It helps protect disc blades and spools from breakage.

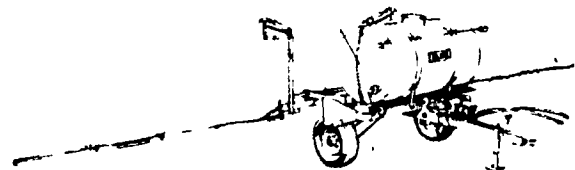

We have over 400 rockflex discs in the fields of PA, MD, NJ and DE. These Krause owners continue to prove daily that the Krause disc levels and cuts better than any other disc they've ever owned.

COMPARE

PRICE: \$ PER lb. KRAUSE DISC HARROWS ARE CHEAPER THAN THE MAJORS
