Harvest Time SPECIAL VALUES

ON THESE HARVESTING MACHINES

EASY ADJUSTMENTS

New John Deere 1219 Mo/Co
features simple adjustments
for easy servicing

Different hay crops have varying conditioning requirements. That's why John Deere's new 1219 Mo/Co gives you the option of changing roll spacing and pressure in just a few minutes.

When crop conditions call for it, simply change the roll spacing to as wide or as narrow as you want. When more or less pressure is needed, just turn the adjusting bolt.

Easy-to-adjust windrow forming shields let you build the type of windrow you want. See the 9-foot 1219 Mo/Co that adapts to your haying conditions.

BIG-TRACTOR CAPACITY

The John Deere 3960 Forage Harvester
... for tractors up to 180 hp

For your big tractors, up to 180 hp, the 3960 is the ideal harvester. Its power-efficient design begins with 48 hungry knives that shear your crop into a fine-cut, uniform forage.

Check out the 2-speed blower. One speed gives you extra power for tough crops, like haylage, while the slower speed conserves energy in easy-to-blow crops like corn.

A wide choice of harvesting units is available. Choose from 2- and 3-row row-crop and ear corn units, 5-1/2- and 7-foot windrow pickups and a 6-foot mower bar. See your dealer today.
