THIS WAGON

won't keep you waiting

You don't have to wait on a wagon that unloads itself. So, the Sperry New Holland automatic bale wagon is the only hay wagon your farm needs.

The automatic bale wagon can pick up bales from the field faster than a baler can make them. At the barn or stacking area, it unloads in just minutes, making tight, rigid stacks, automatically.

Best of all, one person does it all from the seat of a tractor. The bale wagon frees labor for other work and enables you to put up your hay ahead of the weather.

The automatic bale wagon is for farmers who want

to store hay without lifting bales. Hydraulic muscle does the lifting for you. Even the smallest model, "1003", moves over 1,300 bales from field to storage in a normal 8-hour day. A larger model, "1069", handles over 2,500 bales a day.

Some people buy automatic bale wagons just because they don't like backaches.

Ask your Sperry New Holland dealer to compare the price of a bale wagon with that of a bale thrower and three or four wagons. You'll see how affordable an automatic bale wagon can be.
