± 6 eggs = Profit/Loss

According to Waymon Halbrook, University of Arkansas Agricultural Economist, in today's poultry economy the difference between losing and making money on your flock could be in the last ½ dozen eggs each hen in your house produces. DeKalb layers are consistently leading the competition in total profit performance which includes egg numbers. What are you basing your next pullet chick order on? A penny or two savings on chick cost? OR 25¢ per pullet housed on egg income? That's \$15,000 on a 60,000 bird house. YOU BE THE JUDGE!
