NEW!

GEHL®

Full flotation - full conditioning

7'3" and 9'3" Cutting Widths

Now you can quickly change standing hay crops to conditioned, fast-drying windrows with the new 2130 and 2160 mower conditioners from Gehl!

Choose from 7'3" or 9'3" cutting widths. Both machines feature full-width, non-intermeshing conditioning rolls to crack the crop stem, speeding drying while minimizing valuable leaf loss.

Improved header flotation provides ground-hugging cut control, quick response to changes in ground contours.

The 4-bat reel features adjustable speed and tine angle to sweep the crop into the conditioning rolls. Two additional bats are available. A single chain drive, with simplified drive, runs the condi-

tioning rolls and the reel with fewer parts to service, reduced maintenance costs.

Quick adjust windrow shields can be moved by hand (2160 only). And because your crop isn't over-conditioned, windrows stand tall for free air movement. Or you can change to quick-drying swaths.

They're the first step in your haymaking operation -- new 2130 and 2160 mower conditioners from Gehl!

GEHL®

Forage Harvesters, Round Balers and Mower Conditioners have interest free waiver until **April 1, 1984**

Forage Wagons have interest free waiver until **Dec. 1, 1983**

Skid Steer Loaders and Mix-Alls have interest free waiver until **October 1, 1983**
