## Grain co-op hike volume

WASHINGTON, D.C. - Regional and interregional grain cooperatives increased grain volume by 65 percent during fiscal years 1977-81, from 1.8 billion bushels to 3 billion bushels, according to U.S. Department Agriculture economists.

More than four-fifths of this increase was in response to the sharp rise in export demand, according to economists Stanley K. Thurston and David E. Cummins, of USDA's Agricultural Cooperatives Service. Major facility provements and the streamlining organizational structure helped cooperatives respond to the challenge, they said.

Principal grains handled continued to be corn, nearly 1.4 billion bushels; wheat, 819 million bushels; and soybeans, 602 million bushels. Others were grain sorghum, 166 million bushels; barley, 44 million; sunflower seed, 23 million; oats, 17 million; and rye and flaxseed, 7 million bushels.

In fiscal year 1981, 16 primary regional and 3 interregional cooperatives disposed of their grain by processing 6 percent in their own plants, selling 27 percent to domestic outlets, and shipping 67 percent to ports for export. The proportion shipped to port areas has been rising steadily from 55 percent in 1976 to 62 percent in 1978 and 1979, to 67 percent in

Export disposition by cooperatives in fiscal year 1981 was slightly more than 2 billion bushels, compared with 1.5 billion 2 years earlier and 1 billion in fiscal year 1977. Inland originations of grain for export by the regionals and interregionals in fiscal year 1981 accounted for an estimated 41 percent of total U.S. grain exports. This compares with an esturnated 35 percent in fiscal year 1979 and 30 percent in fiscal year

Regionals and interregionals shipped 60 percent, or 1.2 billion bushels, of their export originations — 2 billion bushels — through their

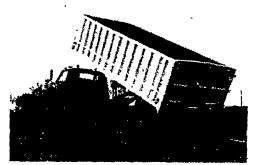

own export port elevators in fiscal year 1981. This proportion has varied annually from 57 to 63 percent

since 1975. Shipments to noncooperative port elevators were 819 million bushels in fiscal year 1981.

#### HEWEY WELDING

Box 2312, Rd 4, Lebanon, PA 17042 717-867-5222

**ALUMINUM GRAIN BODIES & ALUMINUM REPAIRS** 

These ultra-light bodies are designed for strength through engineering, not strength with bulk. For example a 16' grain body with tailgate and 48" sides weighs only 1490 lbs. complete. We'll build you any length or any side height up to 60".

#### Also available

- **★** Double swinging hay hauling tailgate
- ★ Barn door type tail-
- ★ Slide out cattle chutes
- ★ Diamond Flooring
- ★ Pull out panel tailgates
- ★ Any size grain chute
