

## Brubaker wins teacher award

DOYLESTOWN — Gary L. Brubaker, Associate Professor of Animal Science at Delaware Valley College, was presented the Outstanding Teacher of the Year award recently. The annual award is presented by White Eagle Laboratories, Inc. of Doylestown, to a teacher of animal technicians in the Eastern Pennsylvania and New York areas.

The award, an inscribed plaque and a \$1000.00 honorarium, was presented to Brubaker for "his outstanding teaching ability and concern for his students." He is a 1967 graduate of DelVal in Animal Husbandry, and earned his M.S. and Ph.D. degrees from Virginia Polytechnic Institute.

Brubaker has been teaching at DelVal since 1970. He was instrumental in establishing a four-course-sequence in Small Animal Laboratory Management in 1974. 1400 students have successfully graduated from the program since its inception. He has also been influential in placing many of his students in professional careers relating to small animal management within the Pharmaceutical related industries.

Brubaker is advisor to the very active Laboratory Animal Club, supervisor of the small animal lab, and is a member of the scheduling, library, admissions and research committees. He has also served as chairman of the faculty council for two consecutive years, and as advisor for six senior research projects.

He takes an active part in the sheep and swine program at the livestock farm, and uses these facilities in teaching the sheep and swine production course.

Over the past few years he has

assisted the Bucks Extension office in conducting sheep shearing and livestock production schools, as well as the Bucks County wool pool.

Dr. Brubaker is President-elect of the Delaware Valley branch of the American Association of Laboratory Animal Science. His professional memberships include the American Society of Animal Science, Delta Tau Alpha and Phi Sigma honor societies, National Block and Bridle and Outstanding Young Men of America.

His community activities include serving as a member of the Education Committee and as a Sunday School teacher at the Doylestown Methodist Church. He is a past director of the Pinehickon Softball League, has coached softball and gives numerous livestock demonstrations at local high schools and county parks. He and his wife Donna and daughters Jill, 14 and Jackie, 12, reside in Gardenville, Pa.-H.S.

## 2 attend leadership conference

Two members of the Millifenburg FFA Chapter, Alan J. Ard, left, and John K. Hauck, attended the Future Farmers of American National Leadership Conference held in Washington, D.C.

They are shown being greeted by Bruce Kettler, of Ohio, National Vice President.

The week-long program featured included sessions on social and human relations, group leadership and personal communication, motivation and pride to help mold the FFA'ers into better leaders in the chapters and communities.

Ard is the son of Mr. and Mrs. Ray Ard, of Lewisburg. Hauck is the son of Phyllis M. Hauck, of New Berlin. Their advisors are David Woodling, Timothy Weller and Glenn Spangler.

## Automatic ROLLER-MIXER...

A NEW IDEA IN MIXER-FEEDERS

The Efficiency and Quality of Automatic Rolled Grain Combined With Mixing Excellence

Available With ELECTRONIC WEIGHING

Roller-Mixer\* gives you both...

- SUPERIOR PROCESSING
- SUPERIOR MIXING

NOW AVAILABLE - PHONE FOR DETAILS

## Automatic Micro-Mist Sprayer Controls Droplet Size

The Automatic Micro-Mist Concentrate Sprayer can be powered by the tractor pto for use on rowcrops, vegetables and orchards.

The Automatic Micro-Mist Concentrate Sprayer is a faster, more efficient, economical alternative to conventional boom and aerial spraying of rowcrops, vegetables and orchards.

It takes mist blowing techniques a step further by giving the operator the ability to control the diameter of the spray droplets and choose the diameter best for each particular spraying application.

Controlling droplet diameter results in increased effectiveness and reduced materials cost.

The smaller droplets of the Micro-Mister coat all sides of the target evenly, due to the powerful turbulence produced by the unit. The Micro-Mister effectively coats the undersides of leaves, reaches inside trees, even coats the back-sides of fruit.

The compact size and the utilization of chemical concentrates by the Micro-Mister offers many advantages. The unit comes in models that can be powered by PTO on small tractors, or a gasoline powered skid unit that slides into the bed of any pickup. Because the Micro-Mister eliminates the need for cumbersome water hauling equipment that requires additional manpower and time-consuming stops for refilling, the Automatic Micro-Mister saves both time and money.

The Automatic Micro-Mister can offer effective coverage up to 250 feet, depending on application, and can operate at speeds up to 12 m.p.h., with no dangerous overspray or drift.
