Precast Concrete UPRIGHT BUNKER SILO

Featuring a single component design for fast installation and completion. The sections bolt together and the use of a sealant placed in the tongue and groove creates a sealed wall surface.

The sections may be dismantled and relocated. Customers may select any length or width in 5' 2" increments.

A special center wall is available to permit placing bunker silos side by side or dividing existing trench silos.

In addition to silage storage, these upright units may be used as retaining walls or manure pits.
