

OVER 20,000 LBS. OF 3.7 MILK AND CLIMBING

Allen Lee Stoltzfus - *CARVEL FARMS* - Honeybrook. Pa.

Allen Lee and his sons Nathan and Edwin have an outstanding herd of Registered Holsteins. Here he is pointing out Jennifer (Black cow) an 86 point Lucky Royal 2 year old with a lot of potential. Behind Jennifer stands Dutchess (white blaze on face) a 91 PT Elevation with a 5 year old record of 21,529 of 4.3 milk in 322 days.

Brown's Sales Representative Clarence Geib, Allen Lee, and Brown's Nutritionist Dr. Walter Kennett review the production records of Kathy a Job Daughter and Fanny. At 3-2, Kathy made 30,187 of milk and 1071 fat in 365 days. Fanny finished her seven year old record at 33,591 of 4.1% milk, but unfortunately has since died.

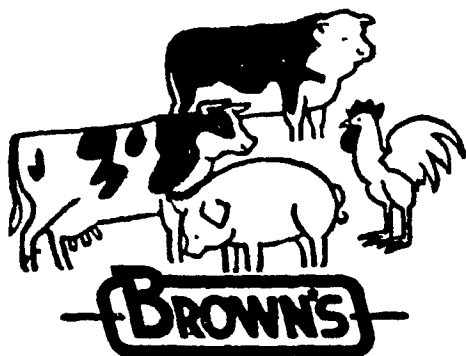

Allen Lee consults regularly with Dr. Kennett regarding his feeding program, and follows it faithfully. Clarence Geib pulls forage samples which go to Penn State and submits a programming request form which Dr. Kennett uses to formulate programs.

Excellent forage quality is a key to high production. Allen Lee sends forage samples to Brown's regularly. Because he feeds a lot of haylage, extra bypass protein is added to his 38 Milkmaster along with additional minerals to meet the nutrient requirements of his high producing herd. One of his biggest problems is drying off cows milking 60-70 lbs.
