WHAT'S STRETCHY?

Wait! Before you buy that bright cheerful fabric to make your Christmas gifts, you have measured its stretch? If you don't spend a little time evaluating the match between your pattern and the stretchiness of that fabric, you could be in for big trouble!

Stability or stretchiness is a critical factor in the suitability of a fabric for a specific use. Most knits and many woven fabrics have some stretch, but the only way you can tell how much is to test each one. Here's how to do it.

— Use pins and a ruler or the stretch gauge on the pattern envelope. Fold the fabric on the crosswise yard direction or cross grain several inches from the cut or torn edge. If you need help, don't be afraid to ask a salesperson in the fabric shop. Then, using pins or your thumbnails, mark a 4 inch or 10 centimeter section. Gently, but firmly, stretch the fabric.

— If you cannot stretch the fabric or cannot stretch it beyond the 4½ inch or 11.5 centimeter mark on the ruler, then it is considered a stable fabric.

— If you are able to stretch the fabric to the 5¼ inch or 13.5 centimeter mark, then it is considered to be a moderate stretch fabric.

— If the fabric stretches beyond the 6 inch or 15.3 centimeter mark on your ruler, it is a stretchy fabric.

Now that you've tested the fabric, read the fabric recommendations listed on the outside of your pattern. Some patterns are designed to be used with moderate stretch or stretchy fabrics only and those recommendations should be taken seriously! Imagine the trouble you'd be in if you made two Christmas stockings of the same size and with the same pattern but for one, you used a super stretchy fabric. Just think how much more Santa would have to put in the stretchy stocking to fill it up!

WHEN TO

INTRODUCE SANTA

"Who's Santa?" That's an inevitable question very young children ask this time of year. Many parents are uncertain about when to introduce their young children to the idea of Santa Claus -

some even wonder if Santa should be avoided altogether.

It's impossible to keep children from hearing about Santa Claus. So take your cues from your children and let them enjoy the fun associated with Santa in a way that's appropriate for their ages. For the first two years, children have little understanding of Christmas activities. The name Santa doesn't have much meaning. In fact, a common reaction to seeing a fat man with a white beard in a red woolly suit is one of fear!

By the age of two, children are more conscious of Santa. But they're usually more interested in the presents under the tree on Christmas Day than they are in how the presents got there. At this age, parents should be careful not to force their children to talk to Santa. Some children just enjoy watching others get up on Santa's lap. Let your children tell you when they're ready to do it themselves.

Usually three-year-old children show a little more interest and believe that Santa brings them toys. Christmas is a time of excitement, but most children of this age are too young to understand the legends and reasons for the holiday season.

At around four, most children are interested in the details of Christmas, but even then, many are confused about what is happening and why.

Santa Claus is very real to the five and six-year-olds. Your children may be interested in writing letters or visiting Santa by this age. They may even want to leave Santa a late night snack. By five or six, children also learn that Christmas means giving as well as receiving gifts. This is an excellent time to let them help make, wrap, and deliver gifts to family and friends.

Your children's attitudes about Santa Claus and Christmas will be influenced by your own feelings and actions. Even when children outgrow their beliefs in Santa Claus, Santa's spirit can stay with them if family members express love and concern for one another by keeping the spirit of giving alive.

Surdiac. Because when it's cold outside it should be coal inside.

The best heating appliance you can buy! Imported from Belgium and hand-crafted of finest quality cast-iron • Up to 90% efficiency • Heats up to 17,600 cu ft • Burns unattended up to 24 hours or more (go to bed at night and wake up comfortable) • Beautiful looking models to match both your heating and decorating needs.
