

Hello,

My name is INNO-Vator. I live on a planet far beyond the sun called Agro. But because of a special invitation from SPERRY NEW HOLLAND AND YOUR LOCAL SPERRY NEW HOLLAND DEALER, I will be visiting Earth next week. I'll be coming to the PENNSYLVANIA FARM SHOW in Harrisburg, Pennsylvania. I attended the show last year and had such a wonderful time visiting with so many farm families that I can't wait to return.

It's such a pleasure telling everyone about that great Sperry New Holland equipment. It's innovative in design (just like me) and dependable in operation. Why, for example, take that new model 499 Pivot Tongue Mower Conditioner. The 12'3" cut combined with the 9'2" conditioning rolls allow for big capacity quality hay production at an attractive price: The 499's got an exclusive light-weight header design for better flotation, and the unique Rola-Reel Header for gentle hay handling. Dual drive twin sickles and a larger hydrostatic pump give you added capacity. On the go hydraulic guard angle adjustment, (also an exclusive), allows for easy adaptation to changing field conditions, from the tractor seat... Oh My I could go on and on! And then there's those Metalert Forage Harvesters, New Skid Loaders and Slurry Spreaders, Round Balers, Square Balers, Automatic Bale Wagons and S.P. Choppers. See all this equipment and much more. But I must hurry and pack my tool box - us robots don't carry suitcases. It's such a long trip to Earth, by the time you are reading this letter I will already have started my journey to Earth.

If I met you last year stop again at the Sperry New Holland Display to say hi. If I didn't see you at the 1983 show please come and talk to me this year. I'll be at the Sperry New Holland Display on Sunday, January 8th thru Wednesday, January 11th all day long. Please come and see me.
