## Fast track to egg cost reduction

Shallow PYRAMID - 3 or 4 high

SSS System - 3 or 4 high

Brood Grow - 3 or 4 high

**Chore Time's MF-MASTER FeedKar** traveling feeder can help you get your egg costs on track. Here's how:

1. The typical chain feeder uses 1 1/2 hp to feed each cage tier - 6 hp for a 4 high. Our hopper system traveling on tracks is pulled by a cable using only 1/2 hp - a 95% energy reduction!
2. Cuts feeder maintenance and labor costs to virtually "zero". You know what a chain feeder costs to maintain!
3. Evens out egg production from one end of the row to the other - birds at the front can't "highgrade" the feed.

We'd like to talk to you about the other ways the nearly 200 feeders we've sold are helping owners. Our FeedKar is now standard on all Chore Time brood grow and layer cages, our famous shallow PYRAMID and new deep PYRAMID our 3 and 4 high SSS.

Find out more about the FeedKar - plus our line of cage systems and the Chore Time total package of feed bins, auger ventilation and waterers.
